Acknowledgements

The organisation of the Second International Congress on Construction History has taken two years. Obviously a great many people have helped in that time and it is not possible to mention everyone but the conference organisers would like to thank in particular the congress planning committee who laid the foundations for making the congress possible; scientific committee and editorial board for all their hard work in ensuring the quality of papers presented at the congress; and Emma Tutton for her help in organising the abstracts.

We would also like to thank Layla Kamlani who designed the brochures, poster and the cover of these proceedings. Thanks also to Dr Brian Callingham, Fellow of Queens’ College who took the photographs which were used on the website, brochures and posters and who let us use his work without charge.

The Committee would like to express their gratitude to Short Run press for producing the proceedings in a very short time.

The Congress is only possible through the generous support of our sponsors to whom we are most grateful.

Lastly, special thanks should go to Claudia Marx who took on the difficult task of reformatting all the papers and putting the publication together, without whose help these proceedings would not have been possible.
